TO THE INTELLIGENT PUBLIC.

The growing opinion among unprejudiced experts is that our present system of constructing pianos is superior to any in the world. Our patent metal key support is an invention of more value to the purchaser than any other ever introduced into pianos.

Our original method of combining the sounding board, wrest plank and metal plate, produces a richer and more permanent tone than is obtained by any other system, without exception.

Competition and increased business have not only improved the quality, but reduced the price, and we think, in view of these facts, coupled with our recent brilliant success in England, that we are entitled to even a larger share of your generous patronage.

PIANOS RENTED AT MODERATE RATES.
