MAKERS OF
Ceramic Golds,
Colors, Enamels,
Kilns and
Artists’ Materials
588 FULLERTON AVENUE
CHICAGO

THE PHOENIX KILN
 PATENT APPLIED FOR

This kiln is built after practical experience of nearly twenty years, during which time almost every kiln on the market has been tried by actual and long continued use in the laboratory.

Remember that this kiln has an iron muffle, and iron is a good conductor of heat. It will not crack and allow destructive gases to enter the muffle and destroy colors, as is the case with fireclay muffles of any kind; neither does it have cracks to be patched up with fire-clay before each fire.

Remember that this kiln will produce glaze and brilliancy of colors unequalled by any other kiln, none excepted.

Remember that this kiln is made of the best material, the most scientific and practical construction, and is fully guaranteed.
