AN EXHIBITION OF AMERICAN ETCHINGS

CHICAGO SOCIETY OF ETCHERS

1911
CHICAGO SOCIETY OF ETCHERS

Officers
Earl H. Reed, President
Thomas Wood Stevens, Vice-President
Bertha E. Jaques, Secretary and Treasurer

Jury of Selection and Hanging Committee
Walter D. Goldbeck
Katharine Merrill
Ralph M. Pearson
Helen B. Stevens
Thomas E. Tallmadge
The Chicago Society of Etchers has existed potentially in several individuals who have been working in more or less solitary fashion for many years. As an organized body, it is only one year old, but during that time it has gathered together twenty active and ninety-seven associate members. Exhibits have been given in Chicago, Detroit, Kansas City and Indianapolis.

The Society hopes, by distribution of etchings to its associate members, and by exhibits in various cities, to make more widespread an intelligent interest in and appreciation of etching—hitherto one of the least understood and most neglected of the fine arts.

The purpose in presenting this exhibit is to show the best available work of American etchers now living and working. It may be considered fairly representative, although some excellent etchers responded either too late or not at all.

Bertha E. Jaques,
Secretary.
FOR INFORMATION REGARDING EXHIBITS FOR SALE APPLY TO MISS WILLARD AT DESK IN ROOM 50. DUPLICATE PROOFS MAY BE ORDERED FROM THE ARTIST THROUGH MISS WILLARD.

ALL PAYMENTS FOR EXHIBITS PURCHASED MUST BE MADE TO THE SECRETARY OF THE ART INSTITUTE.

A NOTE ON ETCHING

IN ANY book germane to the subject, one may pick up the time-honored dissertation upon etching. There is the romantic statement that the art originated with the armourers, who tried out the designs for their chasings by pressing wet paper into the acid-bitten lines; then the long and involved account in which the reader's mind struggles after the author while he coats the plate with wax, draws the picture upon it, immerses it in the acid, "stops out" the background, and cleans off the wax; finally covering the completed plate with ink, wiping it off the surface, and putting it triumphantly through the press. The proof, one is always sure when reading the process, could never be worth the candle.

Then the authors carefully explain how a dry point, not being produced by aquafortis but by the unaided steel point, is properly not an etching at all. The book is very likely to close, if it be not too old a one, with Whistler's Propositions by which he clearly proves that any etching, of a scale and method other than his own, is an error if not a crime.

The difficulty is that from its literary phase one gets no feeling for etching as a living art.

The Chicago Society of Etchers, having no other reason for being than to demonstrate if possible that etching is a living art, begins by offering an exhibition, not a treatise. So the best that we can ask for our preface is that it shall not interfere with the reader's enjoyment of our prints.
An etching, when successful, is a translation of nature, by the notation of accent, form, and the subtle suggestion of color which is always present in good monochrome, into a work of art which has finality and completeness by suggestion. The artist may not render the subject with naturalistic effect. He has already, in choosing his medium, given over all thought of illusion; but he has received in exchange for it the right to be swift and summary in his treatment of facts, to be incisive in his comment on nature, to be fastidious in his choice of matter and design. His medium is a well controlled one—nothing is irrevocable in it save success. In a country where so little of his environment has thus far been subjected to artistic effort, the etcher should find a field for new and vital endeavors.

Meanwhile, the art itself has great traditions, and these for the most part we can but follow, at the risk of treading too closely in beaten paths. This is perhaps inevitable in any medium. But if the etchers working in America have a great task before them, the traditions surely should not be neglected; only out of a knowledge of the best that has been done in the art, can the new fields be conquered. The exhibition of which this is the catalogue should show something of the work already done, and may be, to the imaginative critic at least, suggestive of the part which etching may play in the American art of the future.

T. W. S.
CATALOGUE OF EXHIBITION OF
AMERICAN ETCHINGS

JANUARY, 1911

Aid, George Charles, Paris.
1 Evening, Venice.
2 Ferruchio.
3 Venice.

4 Portland Harbor.
